ENVIRONMENTAL ASSESSMENT PROGRAM

August Mack has been assisting manufacturing companies comply with EPA & OSHA regulatory requirements for over 25 years and ILMA members for the last 13 years.

The Environmental Assessment Program will involve determining the facility's current compliance status with respect to the top six regulatory programs that typically affect ILMA manufacturing members.

1. *Emergency Planning Community Right to Know (EPCRA) Tier Two*
2. *Emergency Planning Community Right to Know (EPCRA) Form R*
3. *Clean Water Act – Spill Prevention Control & Counter Measures (SPCC)*
4. *Clean Water Act – Storm Water Pollution Prevention Plan (SWPPP)*
5. *Clean Air Act - Air permitting review*
6. *Universal & Hazardous Waste assessment*

This Environmental Assessment entails a complete facility records review for the regulatory programs listed above, an on-site walk through, and detailed review of facility operations, floor practices, required environmental plans, permits and training records.

A confidential report will be issued to the facility outlining compliance status with each regulatory program.
